

## New e-OSCAR®

OLDE has launched an initiative to provide a new e-OSCAR® platform to replace the current e-OSCAR® application. The **new e-OSCAR®** will be available for use in **October 2007**. Based upon the requests from Credit Reporting Agencies and Data Furnishers, the new e-OSCAR® platform will provide the following:

- User Interface Modernization
- Enhanced Productivity Reporting
- Updated Self-Help Online Tutorial
- Improved On-line Page Help
- Process-Specific Based Training
- Improved Disaster Recovery Time Objectives
- Monthly Billing for Identified Customers
- Encryption of Database “at rest”

For any questions regarding information on the Newsletter, please contact the e-OSCAR Helpdesk at 866-696-7227.

## Batch Processing for New e-OSCAR®

Batch processing provides Data Furnishers with an alternate method of processing ACDV Requests and Responses through batch files. This support will continue within the new e-OSCAR® platform. Current batch processing clients have already been contacted regarding the batch specifications required for the new platform.

Consider Batch Processing for 2008!

## CGI Partners with OLDE to Build New e-OSCAR® Platform

**CGI**, an international organization founded in 1976, was selected to design and implement the new e-OSCAR® platform. They are now finalizing the requirements phase and beginning the framework design. CGI is ISO 9001 certified and provides our operations with CMMI Level 5 quality, the highest rating available from the Software Engineering Institute.

For more information, visit their website at [www.cgi.com](http://www.cgi.com)

## e-OSCAR® Monthly Newsletter

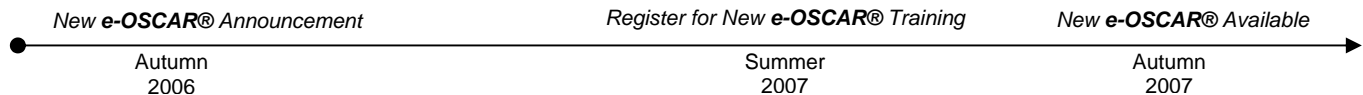

Look for updates within this monthly newsletter to learn more about our progress toward the launch of the new e-OSCAR® platform!

## Training Opportunities for New e-OSCAR®

Training will be available for the new e-OSCAR® system, and registration will open in early summer 2007.

OLDE will provide more detailed information about training and registration schedules in the near future.

## Timeline for New e-OSCAR®

## Change Request Process for Current e-OSCAR®

Change Requests will be reviewed for regulatory impact and software corrections, and only required changes will be implemented within the current e-OSCAR® platform.

Because many past requests for changes and enhancements have already been incorporated in the design of the new e-OSCAR® platform, non-critical changes will not be applied to the current e-OSCAR® platform.
