Effective June 2, 2022 , the following updates were made to the e-OSCAR API Services:

- Allow for Special Characters:
  - Forward Slash (/) , Pound Symbols (#) and Periods (.) to be allowed in the response Fields for API

- Allow for Double Spaces in the Data Fields
  - Previous logic translated a second space between words within a field to a "Null" value – resulting in an error; now the double spaces process as provided

There are no changes required to be made on behalf of the Data Furnishers as it relates to any schema within the API Services.

As always, please review the changes announced within this notification and confirm if these updates may impact your internal operations as it relates to the use of Services by e-OSCAR.

We will continue to provide additional information as we approach the release.

If you have any questions, please contact Christine Macdonald at cmadonald@newmgtservices.com

Sincerely,

The e-OSCAR Support Team
