

The e-OSCAR team recently hosted an introductory webinar regarding our newest product, Insights by e-OSCAR. During this 45-minute webinar, we covered the background of why we are offering a new business analysis and intelligence tool, shared a demo of some of the capabilities and reports we have already created, and covered at a high level how you as a Data Furnisher can become engaged.

We have now posted and are making the webinar available to you in case you were not able to attend the original session, or in case you'd like to view it again.

The webinar is posted in the e-OSCAR Learning Management System (LMS), which you can access [HERE](#).

Once you are logged into the LMS, you can find the webinar by clicking on the Resources tab and then searching for Insights by e-OSCAR on the Categories list:

You will then need to click on "VIEW". You will be prompted to "Save" the file – you must download the file and then click open to watch the webinar.
