

API Final Acceptance Form

- For Data Furnisher to acknowledge acceptance of API Services prior to Go Live in Production.
- Data Furnisher acknowledges that utilization of API Services will require the Data Furnisher to be billed monthly.
- Please email this completed form to Christine Macdonald (OLDE Client Relations Manager) cmacdonald@newmgtservices.com.

API Services Client Company Name	
Registration ID (primary)	

Services List

Data Furnisher confirms that the following Services have been tested in UAT and will be utilized in Production **NOTE – Data Furnishers will be provided access to ALL VERSIONS of any endpoint marked Y that are currently in production:**

Y/N	/auth/
	/auth/
	/changePwd
Y/N	/acdvreq/
	/get/{acdvCtrlNum}
	/view/{acdvCtrlNum}
	/getList
	/getImage
	/viewImage
	/find
Y/N	/acdvresp/
	/get/{acdvCtrlNum}
	/getList
	/find
	/validate
	/submit
Y/N	/aud/
	/get/{id}
	/getList
	/validate
	/submit
	/find
Y/N	/brr/
	/get/{id}
	/getList
	/validate
	/submit
	/find
Y/N	/audnotif/
	/v1/find
	/getList

Services List, continued

Y/N	/notification/
	/find
	/getList
	/getImage

OLDE will enable the services indicated as Y in the Services list for the Data Furnisher in the production environment on the agreed upon date for Go Live. Any Services indicated as N will not be enabled and will not be available in the production environment until the Data Furnisher completes an updated Final Acceptance form indicating completion of testing of the specified Services.

Task List

Completed (Y or NA)	Action
	API Client successfully connected via API Services for all endpoints indicated in the Services list in UAT. (Receiving a 200 response from the API to indicate success)
	API client has successfully received ACDV Request using the /find/ endpoint in the UAT environment. (Receiving a 200 response from the API to indicate success)
	API client has successfully viewed ACDV Request using the /view/{acdvCtrlNum} endpoint in the UAT environment. (Receiving a 200 response from the API to indicate success)
	API client has successfully responded to the ACDV Request via the /submit endpoint in the UAT environment. (Receiving a 200 response from the API to indicate success)
	API client is prepared to receive ACDV Requests and Images from the e-OSCAR Production environment via the API Services connection.
	API client is prepared to send ACDV Responses to the Production environment via the API Services connection.
	API client has successfully created and submitted a test AUD via the /submit endpoint in the UAT environment. (Receiving a 200 response from the API to indicate success)
	API client is prepared to send AUDs to the Production environment via the API Services connection.
	API client has successfully created and submitted a test BRR via the /submit endpoint in the UAT environment. (Receiving a 200 response from the API to indicate success)
	API client is prepared to send BRRs to the Production environment via the API Services connection.
	API client has successfully retrieved AUD and/or Block/DR Notifications via the /find and/or /getList endpoint in the UAT environment. (Receiving a 200 response from the API to indicate success)

API Final Acceptance Form – Batch Data Furnisher Addendum

Batch Data Furnishers implementing ACDV Request Service via API:

Existing Batch Data Furnishers that wish to utilize the ACDV Request Service acknowledge the following:

- ACDV requests will no longer be retrieved via the existing Batch File Transfer.
- ACDV Responses will no longer be submitted via Batch File Transfer.
- ACDV Requests will be retrieved via API Service upon the launch of API Services to the Production environment.
- ACDV Responses will be submitted via API Service upon the launch of API Service to the Production environment.

Task List

Completed (Y or NA)	Action
	API client has disabled all Batch queues in the Production environment
	API client has determined which previous Batch queues (if any) will remain as interactive queues and update all rules and precedent accordingly

API Final Acceptance Form – Batch Data Furnisher Addendum

Batch Data Furnishers implementing only ACDV Response Service via API:

Existing Batch Data Furnishers that wish to utilize only ACDV Response Service, and continue to retrieve ACDV Requests via Batch File Transfer acknowledge the following:

- ACDV requests will be retrieved via the existing Batch File Transfer and API client will not have access to the ACDV Requests Service via API Services.
- API Client must complete UAT testing of ACDV Request Service prior to implementing API Request Services in the Production environment.

Task List

Completed (Y or NA)	Action
	API client has successfully tested the receipt of a Batch data file in the UAT environment
	API client has successfully responded to the ACDV Requests received from the test Batch File Transfer via the /submit endpoint in the UAT environment. (Receiving a 200 response from the API to indicate success)
	API client has tested the Initiate ACDV Batch call via API Services and confirmed that it is not available
